

## WORK PARTY- MIRA STORAGE

Four Club members made up a work party on Thursday September 30, 2010 to service equipment and to reorganize MIRA material stored at the Parksville Industrial site. Len VE7XLH, Greg VE7GCR, Dave VA7QED and Tony VE7AJN hauled antennas, masts and pipe to the parking lot and labelled, re-packaged, and sorted the items for easy delivery when needed. Greg volunteered to truck some of the surplus pipe and remnants of past excesses (PVC pipe, wood, etc) to the dump for disposal.

In all, about an hour and a half of relatively pleasant labour did the job, leaving the storage area tidy and much less of a hazard to everyone who uses it, such as visions of the bathroom collapsing under the weight of MIRA gear on some innocent, hapless firefighter! The only casualty of the day was Dave's shirt- inadvertently "labeled" with white paint. No doubt it has happened before but usually with Navy grey.
